Please continue to fund the Juneau Access Project. The project needs to be completed as soon as possible. Once completed, this project will provide significant cost savings to both the state and the user. This project has statewide benefits in terms of access to and from the capitol city, and in terms of providing surface transportation to/from a regional hub at a lower cost to all. By improving access to the largest city in Southeast, other communities in the region will also benefit from the improved access to the region. Few projects, if any, provide such a statewide benefit and cost savings.
